

PRODUCT BULLETIN

Date: December 1, 2020
Update Number: P2020-22
Subject: DC Wi-Fi® Garage Door Opener Logic Board Upgrade
Product Affected: Models 85503, 8550WLB, WLED, 8580WLB, and 8360WLB

As part of LiftMaster's commitment to provide innovative, state-of-the-art products, we are pleased to announce updates to our LiftMaster® Residential Garage Door Opener lineup. The logic board in our DC Wi-Fi openers has been upgraded with the following enhancements:

- Integrated Bluetooth technology will make it faster and even easier to connect to myQ®.
- Improved opener battery life with increased door usage when operating during a power outage on battery backup mode.
- Improved Wi-Fi range between the opener and your router.
- Faster processor and increased memory compared all other garage door openers.

We will be rolling out this logic board upgrade to Elite and Premium DC Wi-Fi openers beginning in February. Model numbers affected by this change are 85503, 8550WLB, WLED, 8580WLB, and 8360WLB. The model numbers will be remaining the same and each will be rolled out as a running change. Because this is a running change, please make sure to rotate your stock accordingly.

Models with that receive the upgrade logic board will be identifiable by:

A Blue Dot on the Product Carton

A Bluetooth Icon on the Garage Door Opener Cover (Circled in yellow)

The new DC Wi-Fi® Garage Door Openers enhances the product line and enables you to meet the needs of homeowners looking for the safest, most technologically advanced openers with the latest myQ® features. LiftMaster is investing in myQ to be able to offer users an upgraded experience to our expanded vision of access and knowledge with innovative, value-add services. Connected openers allow for future software upgrades, new features, and automatic updates to avoid possible functionality issues and avoid potential service calls. With LiftMaster's investment in myQ, there is no incremental cost on the new openers to get this upgraded experience. Contractor Series 8160WLB and 8160W will be upgraded in Q3 2021 and more information will follow on those models.
