Subject: UL325 standard Ed. 7

Dear FAAC Customer,

Due to the upcoming changes in the UL325 standard (Ed. 7 effecting August 2018) we want to inform you about the status of our UL listed products.

- 24V volt operators with the E024U control board: already compliant with the 2018 standard, there are no changes to part numbers
- High Voltage operators with the 455D control board: we made some changes to the software, see the attachment for more technical details. There are new part numbers for the boards that comply with the 2018 standard:

Part Number	Description	List Price
790944	455D 115V Control Panel UL2018	\$753
790945	455D 230V Control Panel UL2018	\$753

These new boards will be included in all the new kits that will be manufactured from August and must be used in all new installations to be compliant with the new UL standard. We will send another communication later on with the exact date of the change. The old version of 455D will still be available, but only to be used for replacements in existing installations.

- 844 with the 780D control board: already compliant with the 2018 standard, there are no changes to part numbers. As a slide gate operator the 844 requires entrapment protection devices on both opening and closing.

Should you have any questions, please do not hesitate to contact us. Thank you for your continued support.
